Our Company

Marinelli is an Italian company based in Pesaro, specialized in the production of kitchens and bathroom furniture. Founded in 1973, Marinelli stands out for the quality and innovation of its products, combining the excellence of Italian design with a modern and timeless style.

Since 2019 Marinelli has started exporting its products internationally, consolidating its presence on foreign markets and constantly expanding its distribution network.

Made-in-Italy & Innovation

Marinelli Cucine is synonymous with quality, tradition and high-level production. Thanks to our continuous effort the company has obtained the prestigious Made-in-Italy UNI 11674 certification for furniture. This important milestone guarantees the origin, safety and durability of our products. Thanks to state-of-the-art machinery and technology, in our factories we produce more than 1000 kitchens a day all marked as Made-in-Italy.

“*Doing things
that have already been
done in a new way.*”

— J.A. Schumpeter

For more than 30 years, Marinelli Cucine has been manufacturing high-quality products that meet the domestic needs of its customers and satisfy their aesthetic tastes. To achieve these results, the company has always believed in the value and courage of innovation combined with a constant partnership with our suppliers and the use of raw materials from the best producers on the market. We are proud to be able to present ourselves to our customers with various prestigious awards obtained in the field of international certification, both in terms of the quality of our production processes and the environmental sustainability of the resources we use.

Product quality & sustainability

ISO 9001 : 2015 QUALITY MANAGEMENT SYSTEM

The quality management system adopted by Marinelli Cucine is focused on research and innovation in all production processes. Every stage of production, from design to planning to assembly of all our kitchens, is included in an optimization program aimed at obtaining a high-quality, long-lasting end product.

ISO 14001 : 2015 ENVIRONMENTAL MANAGEMENT SYSTEM

This certification confirms our concrete commitment to environmental protection and attests to a concrete and verified commitment to sustainability. Every stage of our work is carefully monitored: from the responsible choice of raw materials to the manufacturing processes, with the aim of reducing environmental impact and optimizing the use of resources.

ISO 45001 : 2023 HEALTH AND SAFETY AT WORK

Our company, which has always been focused on continuous improvement and the quality of its processes, has chosen to adopt the ISO 45001 standard in order to integrate a structured and effective occupational health and safety management system into its existing high quality standards.

CERTIFICATION OF ITALIAN ORIGIN OF FURNITURE

Our company has obtained UNI 11674 certification, which officially certifies the Italian origin of our furniture. All relevant stages of the production process take place in Italy. This certification gives our customers the certainty of choosing authentically Italian furniture, synonymous with design, reliability, and attention to detail, in compliance with the quality standards that distinguish Made in Italy.

COSMOB QUALITAS PRAEMIUM. LOW FORMALDEHYDE EMISSIONS

Our company has always been committed to using melamine and MDF panels with low formaldehyde emissions. The "COSMOB Qualitas Praemium - Formaldehyde" certification meets the requirements of the SDC 03 Rev. c certification scheme and the Italian Ministerial Decree of October 10, 2008, as well as the formaldehyde emission limits defined by the "Banz AT regulation

OUR RANGE OFFERS FSC-CERTIFIED PRODUCTS

Choose our FSC-certified products, which represent not only excellence in quality, but also a concrete commitment to environmental, social, and economic sustainability. The FSC label, internationally recognized as a symbol of forest and natural resource conservation, guarantees that the materials used come from responsibly managed forests and rigorously traced supply chains, from raw materials to finished products.

NOT JUST SUPPLIERS, BUT PARTNERS TOO

Marinelli has selected the best suppliers of raw materials and hardware on the market to offer end customers a product of exceptional quality that will stand the test of time. All companies are certified and internationally recognized for the quality of their products. For us, these companies are not just suppliers but also reliable partners we can count on to always deliver an exceptional and durable product.

Our kitchen range offers over 50 exclusive colors, all modern and in line with the latest interior design trends. A rich and contemporary palette that allows you to customize each kitchen according to your style, creating unique, elegant, and always contemporary environments. There is also maximum design freedom thanks to five different finishes, designed to satisfy different tastes and needs. You can choose between smooth surfaces, the natural elegance of wood, the innovation of the Zenit finish, or opt for glossy or matte lacquers for a more contemporary and refined effect. A variety of materials and finishes that allow you to create unique, personalized kitchens that are always in line with your style.

Every environment is different and every need is unique: that's why we offer an extremely wide-ranging modular system that can be adapted precisely to both compact spaces and large kitchens, always guaranteeing a functional, harmonious, and aesthetically balanced result. The extensive modularity allows you to make the most of every available centimeter, eliminating wasted space and enhancing even the most complex areas of the kitchen. The different solutions allow you to create dynamic compositions, with a play of volumes and heights that make the kitchen functional but also visually refined. This is complemented by the possibility of choosing various plinth heights, a fundamental detail for adapting the kitchen to the user's height and improving comfort during everyday use, as well as contributing to the aesthetic balance of the entire project. The presence of corner base and wall units allows even the most traditionally difficult areas to be fully exploited, transforming them into practical and easily accessible spaces. Completing the modular system, the column elements offer further possibilities for customization and vertical organization of space. This solution allows the kitchen to be integrated in a way that is consistent with the architecture of the environment, creating orderly, spacious, and perfectly aligned compositions. In short, the modularity of our kitchens represents a perfect balance between custom design, advanced functionality, and aesthetic freedom. A system designed to adapt to the needs of today and tomorrow, capable of evolving along with the space and those who live in it every day.

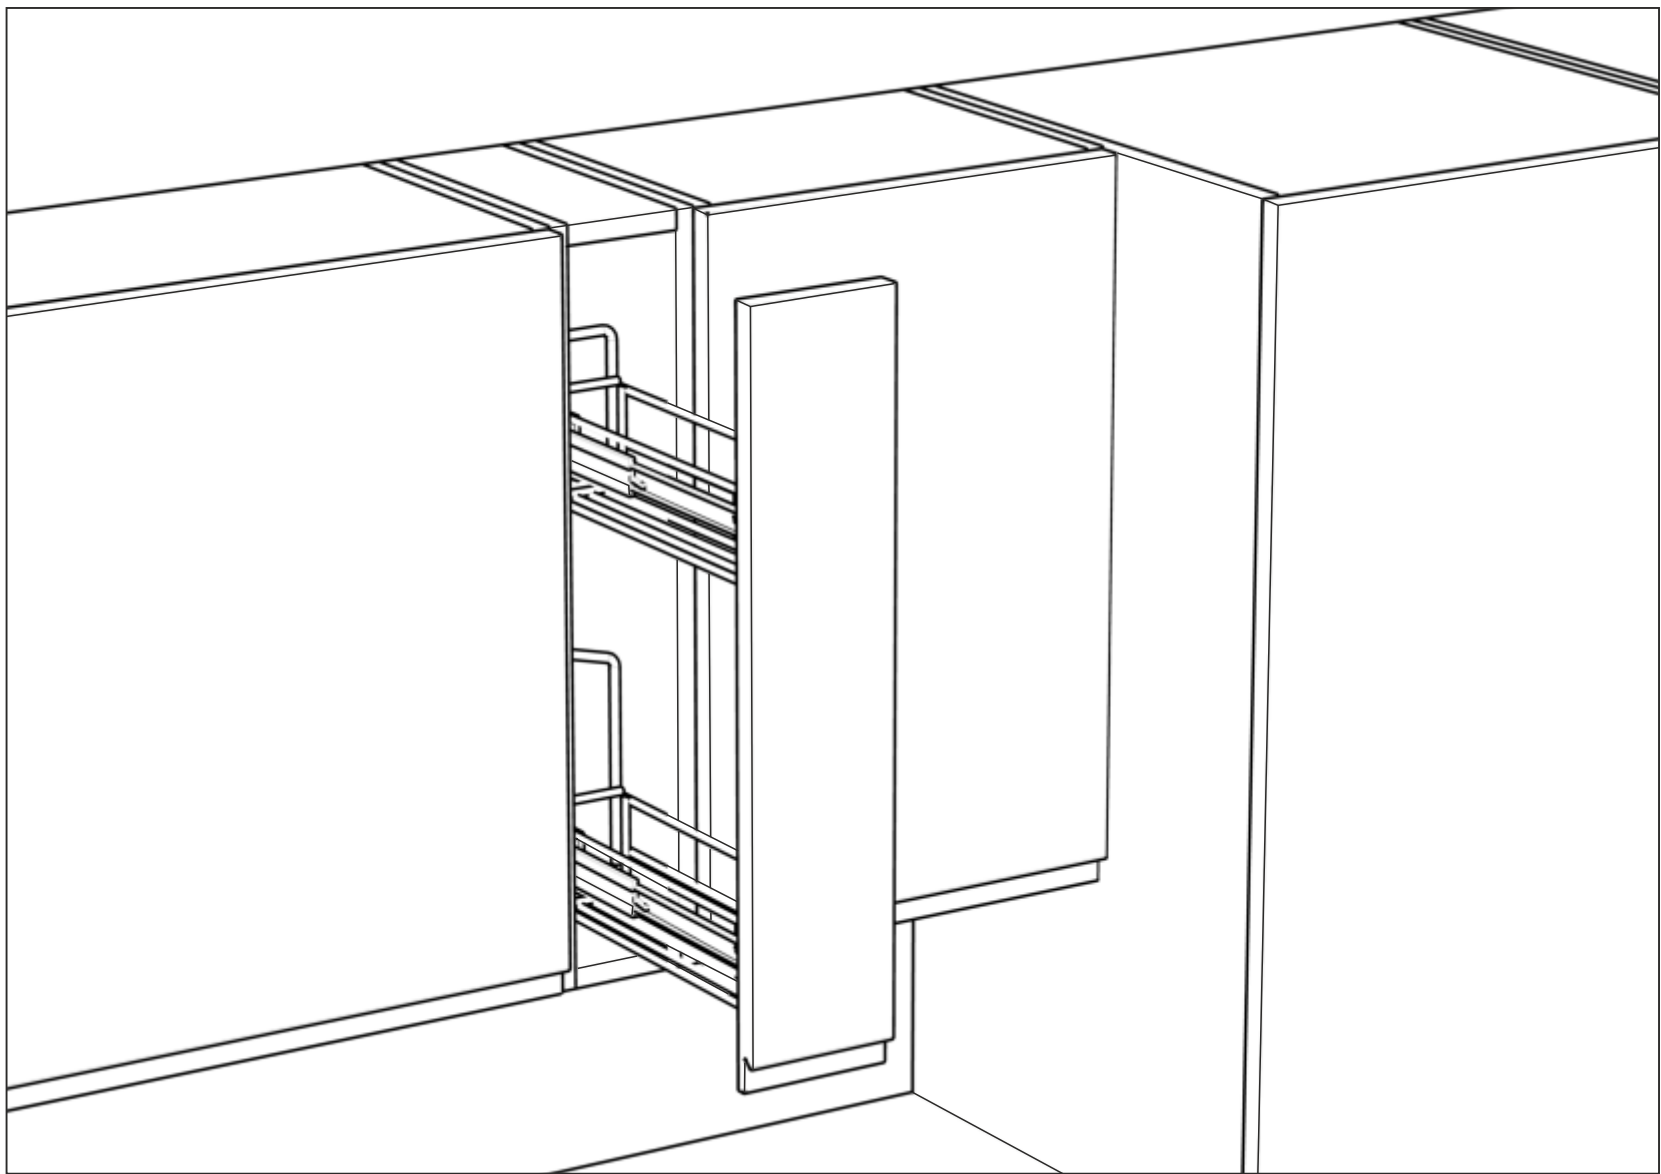

Our kitchens can be fitted with various pull-out basket systems, designed to make the most of every inch of interior space and make organisation more functional and efficient. These accessories maximise the interior space of the cabinets, allowing you to keep everything tidy and perfectly visible.

The pull-out baskets allow you to have utensils, supplies and accessories always at hand, avoiding wasted space and making everyday use of the kitchen more convenient. Full extension facilitates access even to the deepest areas of the cabinets, greatly improving practicality and ergonomics.
